The Clinical Research Development Unit of Shahid Rajaei Educational and Medical Center (CRDUSREMC), Alborz University of Medical Sciences held the Third National Congress on Clinical Case Reports (CCR 3) in Karaj, Iran on December 25-26, 2019

(Figure 1). This congress brought together physicians and researchers from several prestigious institutes, universities, and research centers throughout Iran. The meeting program was organized into several panels in different disciplines including pediatrics, internal medicine, cardiovascular disease, surgery, neurosurgery, urology, nursing, obstetrics and gynecology, traditional medicine, psychiatry, orthopedics, infectious diseases, neurology, and laboratory sciences. Participants were invited to submit scientific contributions as oral presentations or posters. After evaluation of the 858 abstracts received, the scientific committee selected 40 studies for oral presentations, and 231 as posters (Table 1).

The proceedings of the congress formally started with the speech of Dr. Hossein Karim (President of Alborz University of Medical Sciences and the Chairman of the Supreme Congress) and Prof. Mohammad Noori Sepehr (Vice Chancellor for Research and President of the Congress). The 2019 CCR3 program was masterfully composed by Dr. Shahrooz Yazdani (Scientific Secretary of the Congress) and Dr. Kourosh Kabir (Dean of School

of Medicine, Alborz University of Medical Sciences, Iran) (Figure 2). In the current conference, over 1000 researchers from different parts of Iran came together to present the latest advances and transformative discoveries in the medical sciences (Figure 3). Highlights of this meeting included plenary lectures from top national scientists and the recognition of the reports of leading and junior scientists with some top awards such as the Clinical Research Development Unit (CRDU) award for excellence in case reports, the young presenter award, etc.

In the end, the congress closed with the photo memoir of the executive team and attendees of the conference (Figure 4).
